MANAV MATE

Associate Product Manager | Product Builder

Mumbai, Maharashtra, India | +91 85915 95889 | manavmate53@gmail.com | linkedin.com/in/manavmate

PROFILE

Product builder with hands on experience taking software from user research to working prototype and live launch. At HireFlo, owned product development from discovery to release: mapped user flows in Figma, wrote technical stories in Jira, and built core backend features using Python, Supabase, and open source LLMs. Strong quantitative background from 3+ years studying capital markets and auditing fintech architectures (Stripe, Dhan), combined with 4 years running on ground operations for 200+ commercial projects. Focused on rapid prototyping, clean user interfaces, and solving real user drop offs.

CORE SKILLS & TOOLS

Product Management: Product discovery, user stories, acceptance criteria, PRD authoring, backlog grooming, sprint planning, feature prioritization (RICE, MoSCoW), release tracking

Design & Prototyping: Wireframing, interactive prototyping in Figma, user journey mapping, usability testing, information architecture

Analytics & Data: SQL, Advanced Excel, Google Analytics, Mixpanel, Tableau, Power BI, conversion funnels, drop off analysis, financial modeling

AI & Engineering: Prompt engineering, LLM integration, Llama 3.1, NVIDIA NIM, OpenAI API, Python, Flask, Supabase (PostgreSQL), REST APIs, Postman

Product Frameworks: Jobs To Be Done (JTBD), North Star Metric, AARRR pirate metrics, Kano model, Radical Product Thinking, Design Thinking

PROFESSIONAL EXPERIENCE

Product Owner & Builder 2026 to Aug 2026

HireFlo India • Mumbai, India

- Owned the entire product lifecycle for an AI recruitment tool, from problem discovery through Figma prototypes, sprint delivery, and production release.
- Conducted discovery interviews with recruiters and staffing operators to map core bottlenecks across resume screening and applicant follow ups.
- Designed all user interfaces, Kanban pipeline boards, and candidate screening screens in Figma.
- Evaluated technical architecture trade offs, replacing Gemini with NVIDIA NIM running Llama 3.1 8B to cut response latency and lower per parse compute costs.
- Restructured platform monetization from a 15 day trial lockout to a 5 tier freemium structure, supporting recurring billing tiers up to INR 59,999 per month.
- Isolated and resolved critical production defects including Kanban stage update reverts, cached subscription plan labels, and bulk upload memory errors.
- Engineered an automated file parsing pipeline capable of processing approximately 1,000 resumes in 10 minutes.
- Created a 13 slide institutional pitch deck and ran B2B outreach across staffing agencies in 10 Indian cities.

Operations Lead & Business Owner Dec 2022 to Feb 2026

NeoManpower • Mumbai, India

- Managed on ground operations and project delivery across 200+ commercial events and corporate assignments.
- Recruited, briefed, and scheduled teams of up to 133 personnel under tight operational deadlines.
- Handled client communication, commercial contracts, and billing schedules with 30+ partner companies, maintaining zero SLA breaches.
- Solved unexpected operational issues live on site, keeping project delivery on schedule and clients satisfied.

Independent Market Researcher & Quantitative Analyst 3+ Years

Self-directed • Mumbai, India

- Analyzed order flow patterns, institutional market liquidity (FII and DII), and options data across Indian capital markets.
- Built *Institutional Alpha OS*, an interactive data model applying the Kelly Criterion to test capital allocation rules and position sizing.

PROJECTS & PRODUCT TEARDOWNS

- **Lead Radar:** Engineered an automated data extraction script in Python to gather and clean verified business contact details from web directories into Google Sheets and Excel.

- **Ketto Campaign Assistant:** Built a working prototype in Python using OpenAI APIs and Figma flow models to help crowdfunding creators write high response outreach updates.
- **Fintech Case Studies (Dhan & Stripe):** Audited Dhan digital onboarding funnels, KYC document verification flows, and order placement speeds. Analyzed Stripe checkout conversion funnels, developer APIs, and payment error response handling.
- **Product Teardowns (13 Platforms):** Analyzed onboarding friction, habit loops, and UX trade offs for Notion, Slack, Figma, Spotify, Netflix, Duolingo, and Airbnb.
- **Corporate Financial Model (Alok Industries):** Built integrated valuation and operational forecasting models in Excel, analyzing capital structure and operating cash flows.

EDUCATION & CERTIFICATIONS

- **Bachelor of Commerce (B.Com)** – University of Mumbai
- **Design Thinking** | **Business Analytics Fundamentals** | **Business Management** – UpGrad
- **AI for Product Management** | **Radical Product Thinking: Vision Setting** | **PM Basics** – Pendo.io (2025)
- **Summer of Product (SOP2025)** – HelloPM (2025)
